COVID-19
During FY20, North Carolina has suffered the repercussions and threats of a global pandemic. Early care and education has been deemed the essential service that it is, but the impact to the field from COVID-19 has been and will be significant. Many have expressed concerns about the ability of the field to rebound at all, and others have speculated that a large percentage of child care programs will be forced to close. While the long-term impact is not yet known, what is clear is that many programs have stepped up to the plate to provide services to other essential personnel and their families, putting their own lives at risk in the process. They are always the *workforce behind the workforce*, but that has never been more true than it is today. The frontline professionals that have worked to help people through this crisis, including doctors and emergency personnel, could not have done so without early educators. The growing awareness of the critical needs met by this workforce has resulted in calls for much-deserved increases in compensation. Infant-Toddler Educator AWARD$® is one available option for getting these increases into the hands of those working with our youngest children.

The Division of Child Development and Early Education (DCDEE) provided temporary monthly financial bonuses to support the early care and education workforce during this time of crisis. In addition, as the contractor and sole funder for AWARD$, they approved temporary procedural and policy changes to ensure that AWARD$ participants could receive their salary supplements. The key changes included:

- Employment confirmations for participants were suspended for the final quarter of the year. Payments were issued based on the most recent confirmation AWARD$ had on file. New applicants received an early confirmation to verify the application information.

- Participants were held harmless due to impact from COVID-19 from March through June. For example, a participant working in a site that closed still received her/his salary supplement. AWARD$ did not actively seek employment information, but if learned, the participant was not negatively impacted.

Child Care Services Association was honored to serve the field through the consistent implementation of AWARD$ and appreciates DCDEE’s flexibility. The AWARD$ staff were able to successfully and effectively ensure the program’s continuation remotely with laptops funded and approved by DCDEE.

Due to the policy and procedural changes listed here, as well as the uncertain and fluctuating status of child care employment, the AWARD$ report includes some temporary adjustments. Most tables reflect the “active” participants from October through June in order to include all new applicants that were picked up and paid, even during the special “COVID” period. It also allows the program to accurately reflect the education increases that were submitted throughout the full nine-month contract. It is important to note, however, that AWARD$ did not conduct confirmations in the last quarter. The active number for these tables includes all of those that were still eligible prior to the suspension of confirmations, and new applicants that were paid.
The turnover table, however, is generated differently. The data from this table will reflect only the period of time from October through March. This enables AWARDS$ to show turnover prior to the largest impact of COVID-19 on sites and will reflect confirmed employment. Pulling the data through June would not provide an accurate reflection with our COVID-period adjustment.

PROGRAM DESCRIPTION
Infant-Toddler Educator AWARDS$® provides education-based salary supplements to low-paid teachers working full-time in infant-toddler classrooms in North Carolina. The program is designed to better compensate and retain well-educated teachers working with our youngest children. AWARDS$ is funded by the Division of Child Development and Early Education (DCDEE).

STATEWIDE PROGRAM ELIGIBILITY
To be eligible for at least one six-month payment during the fiscal year, applicants must:
- work at least 35 hours per week with infants, ones or twos.
- earn at or below $18 per hour.
- work in a licensed child care program with at least three stars.
- have an Associate Degree plus or including at least 24 birth to five focused semester hours or higher.

PROGRAM OVERALL IMPACT
Infant-Toddler Educator AWARDS$® impacts the community by improving the quality of early care and education for young children. Most evidence suggests there are three primary factors associated with teacher quality: education, stability and compensation. Through graduated salary supplements, the program helps decrease turnover and encourages the continued educational pursuits of the child care workforce. The funding helps address financial stress that participants may experience, giving teachers a better opportunity to focus on the children in their classrooms rather than on the economic challenges they face. The compensation is critical, particularly now as North Carolina wants to rebuild its economy, but can only do so if early educators can afford to return to and stay in the field. As of June 2020, 1,287 child care professionals in 745 child care programs were active AWARDS$ participants (those who have been paid and are still eligible based on their most recent employment confirmation).

Turnover
Turnover numbers for Infant-Toddler Educator AWARDS$® in FY20 reflect active participants who left their child care programs between October and March. Confirmations were suspended for the final quarter of the year due to the impact of COVID-19.

If a participant leaves her/his program and resumes eligibility at a new site, s/he will not be factored into the report until s/he has completed a full six-month period at her/his new site. Once s/he receives a supplement, s/he will again be recognized as an active participant. Only participants for whom AWARDS$ could have impacted the decision to stay or leave are factored into the turnover data. For example, participants who become ineligible for reasons other than leaving their child care programs (i.e. over the income cap due to raise, change of position within the program, elected Child Care WAGE$® instead) are not considered turnover.
The turnover rate of AWARDS$ participants for the stated time period in FY20 was 3%, well below the turnover rate of 25% established as the contract goal. It is also below the 21% of infant-toddler teachers who indicated in a 2015 survey that they anticipated leaving the field within three years (Child Care Services Association, 2017).

So much remains unknown regarding how many centers will open and remain open, how many teachers they can employ as families struggle with the decision and/or ability to place their children in child care and how many teachers feel safe returning to the field. What is clear, however, is that with infant-toddler teachers earning on average only $10.00 per hour in North Carolina, the ability to return to and stay in their positions is much more challenging. The AWARDS$ supplements address retention and make it more possible for educated professionals to afford to teach young children, particularly in this current landscape.

In addition to statistical data showing an impact on retention, AWARDS$ participants shared through evaluation feedback that supplements play a role in the decision and ability to stay in the field. See Appendix A for selected survey comments regarding retention.

“Infant-Toddler Educator AWARDS$® is very important to me, it helps to ease my financial situation. Child care centers benefit because it helps them to retain staff for longer periods of time. The children benefit because they continue to have the same teachers, which helps them to feel comfortable, to bond with them, and feel secure, happy and safe. I love knowing that I can count on extra financial support.” (Buncombe, teacher)

Education
In order to participate, teachers must have at least an Associate Degree with 24 birth to five focused semester hours, so this population, although poorly compensated, represents a well-educated segment of the early childhood workforce. Especially given these levels of education, the population is woefully underpaid. Table A below examines the median hourly rate of participants within each education level on the scale.

*See attached scale for additional information on education.

Though participants already have higher levels of education, 87% of the survey respondents still indicated that Infant-Toddler Educator AWARDS$® encourages or helps financially support additional coursework. The workforce study expected later this year should provide information regarding how the AWARDS$ population compares to the infant-toddler workforce at large.
Sixty-six percent (66%) of the AWARD$ active participants are people of color. Given the diverse population of children attending child care in North Carolina, this educational equity is very important.

Through survey feedback, participants took the opportunity to express the importance of education and how AWARD$ supports, recognizes or rewards their efforts. See Appendix B for samples.

“Infant-Toddler Educator AWARD$® is important in that it recognizes the child care professional. It means that resources can help me continue education, and help make ends meet while I continue to reach my goal in education. I’m getting the education I need to become a force in the community and children's lives.” (Stokes, teacher)

Compensation
Infant-Toddler Educator AWARD$® increases the compensation of participants through salary supplements. Despite obtained education, compensation in the field continues to be low and is not competitive with many other professions. The ongoing compensation plight of the field has been highlighted by the expectation that early educators continue to work through the pandemic despite dismal salaries. The state acknowledged this issue by providing $950 in bonus pay for two months to those teachers who were making it possible for other essential personnel to work. Even in the best of times, early educators simply do not earn enough, which is illustrated by a comparison to the rate of $24.73 that may be needed for one North Carolina employee with one child to meet basic, fundamental needs (Living Wage Calculator, Massachusetts Institute of Technology, 2020). With employers like Target paying entry level wages of $15 per hour as of July 2020, it increases the challenge of keeping early childhood teachers in the field. Thirty-six percent (36%) of the active AWARD$ participants earn less than $12 per hour and 77% earn less than $15 per hour. The poor compensation across the board highlights the need for salary supplements in order to attract and retain qualified staff. Infant-Toddler Educator AWARD$® survey results support this. Ninety-seven percent (97%) of the respondents stated that AWARD$ encourages them to stay with their current child care programs.

The average six-month supplement payment issued during FY20 was $1,271. The scale ranges from $2,000 to $4,000 per year. Ninety-nine percent (99%) of evaluation respondents indicated that receiving an AWARD$ supplement helps ease financial stress. When asked about the financial impact, recipients selected from a list of potential benefits. A sample of responses is below:

- 83% are better able to pay their bills
- 70% are more able to address the basic needs of their families (food/housing)
- 63% rely on the supplements to help address transportation costs
- 61% use the funds to provide additional resources for their classrooms or child care programs – in a separate question, a greater number of respondents (93%) stated that providing resources for their programs is a benefit of AWARD$

Economic insecurity impacts teacher well-being, and can have consequences for the quality of
interactions they have with the children in their care. Studies continue to highlight how stress and adversity can affect the health of teachers and thus how effective they can be in promoting the supportive environments and engaging interactions children need. Especially now, easing financial stress is critical for the participants, their families and for the children they serve.

Throughout the survey, respondents discussed the importance of this additional compensation. Please see Appendix C for sample comments.

“I think AWARD$ is important because it helps single mothers as myself make ends meet. Most child care providers are living paycheck to paycheck. Just one check from being homeless because of the little pay that we make. Even having degrees, we are not making what we should and sometimes it makes you want to give up. This program has really been a blessing to me. I thank God for it.” (Cumberland, teacher)

Infant-Toddler Educator AWARD$® payments: One thousand two hundred twenty (1,220) teachers working in child care centers and 133 educators working in family child care homes were paid for completing at least one six-month period on Infant-Toddler Educator AWARD$® between October 2019 and June 2020. These participants worked in 770 facilities in 92 counties

---

serving approximately 20,335 children. This number is an unduplicated count of supplement recipients for AWARDS®. A variety of outreach efforts were targeted to family child care homes throughout the year, including mailed and emailed information, newly designed postcards, calls, recruitment from EEC and previous Child Care WAGE$® participants, collaboration with child care resource and referral representatives and a deadline extension to allow for two payments in the shortened fiscal year.

Outreach and recruitment: Twenty-three (23) outreach sessions sharing Infant-Toddler Educator AWARDS® information were completed in FY20. When appropriate, staff discussed opportunities available through AWARDS® and WAGE$, and many sessions were completed in conjunction with the T.E.A.C.H. Early Childhood® Scholarship Program as well. The goal is to give audience members an opportunity to learn about multiple resources supported by DCDEE. These opportunities included presentations and informational tables directed toward early care and education professionals, site visits, trainings for technical assistants and presentations for DCDEE consultants. Field-based outreach was suspended in March due to COVID-19. As we had already conducted 23 outreach sessions by March, we fully expected to meet or exceed expectations had we not had the COVID-19 shutdown.

In addition to the outreach listed above, 9,979 recruitment emails or mailings were sent to 3,667 facilities. Newly designed postcards were utilized to increase interest. AWARDS® also sent information to key partners including Smart Start partnerships, resource and referral agencies, community colleges, and infant-toddler specialists. Follow-up calls were made to many of the non-participating sites to verify receipt of the email/packet, answer questions and encourage participation. During each employment confirmation completed with a participating site, the counselor also inquired about any possible eligible staff not yet accessing a supplement.

Outcome #1 is measured through employment confirmations completed as each participant concludes a six-month commitment period on the program. In this report, the period covered is October through March. The information regarding turnover is entered into a database that
produces the percentage. Outcome #2 is based on survey responses collected and calculated by the research department at Child Care Services Association (CCSA).

PROGRAM EVALUATIONS
The information below reflects the impact of Infant-Toddler Educator AWARD$® from the perspectives of participants and their employers. Salary supplement recipients and center directors who had recipients among their staff participated in an annual evaluation. The survey process began prior to the COVID-19 crisis in North Carolina, but individual participants may have responded after this became a reality.

The information below reflects the impact from the participant perspective. While a sample may be used in the future, for FY20, all respondents who had received a payment as of March were invited to participate in the evaluation process. Additional family child care providers were added at a later date to accommodate new applicants. Directors in counties funding the Child Care WAGE$® Program who were not personally participating but who had staff members on AWARD$ and/or WAGE$ were sent a shared survey to assess the impact of salary supplements. Directors in other counties who had staff members on AWARD$ also received a survey.

Potential respondents were invited to complete the survey online. Reminder emails were sent to encourage online response. Those who did not participate online or who did not have email addresses on file were also mailed surveys. All respondents were given the opportunity to be entered into a drawing for professional resources.

Overall, 72% of the targeted population completed the survey (1,470 of 2,049), which included the following:
- 75% of participating teachers/family child care providers (784 of 1,050)
- 69% of non-participating directors with staff receiving salary supplements (686 of 999)

Survey recipients were asked to examine a list of possible benefits resulting from AWARD$ and indicate whether or not each benefit is true for the respondent. Responses to the individual options were as follows, with many providing additional examples of assistance:
- AWARD$ helps me feel more satisfied with my job. – 97%
- AWARD$ is an incentive for me to seek additional education and/or it helps make pursuing coursework more financially feasible. – 87% (participants must have at least an Associate Degree with 24 hours of birth to five focused coursework to be eligible)
- The AWARD$ supplement helps ease financial stress. – 99%
- AWARD$ encourages me to stay with my current program. – 97%
- My AWARD$ supplement helps me to provide more resources for my program or classroom. – 93%
- Receiving the AWARD$ supplement makes me feel more appreciated and recognized for my work. – 98%

Non-participating directors in some cases may have responded about participants in AWARD$ and/or WAGE$.

Additional survey results are listed below:

Nearly 100% of all respondents stated that they are satisfied with the program and its administration.

For those respondents who had the opportunity to speak with the Infant-Toddler Educator AWARDS® staff, nearly 100% of those who have had interactions found the staff to be pleasant and helpful. The bulk of the respondents were AWARDS recipients, and non-participating directors responded about the staff from both programs based on the participation in their sites. Many respondents took the opportunity to share additional comments about their interactions with AWARDS staff. Not only did the respondents report that they received helpful and pleasant customer service, but many also talked about how important the encouragement from AWARDS staff has been in terms of participation in the program and pursuit of education. A few examples of participant feedback are listed below:

“They're totally awesome, very helpful, pleasant and truly professional.” (family child care provider)

“The advisors/counselors have always been courteous and helpful. They answer questions and keep me informed about the AWARDS program. If I miss a document, they call to remind me of what's needed. They have been great in explaining what they do and why.” (teacher)

“The staff I have talked with were very helpful and took the time to help me with whatever I needed. They were indeed awesome and helpful.” (teacher)

“I enjoyed speaking with the staff member. She was very helpful and clear in explaining what I needed to do to apply for the award. I also received my results from the application in a timely manner.” (teacher)

“The staff are always helpful, courteous and professional.” (director)

Ninety-five percent (95%) of responding directors indicated that staff participation in AWARDS benefits the children in their centers in some way. When asked to select from a list of options explaining how participation may be beneficial to the children in their programs, including an option stating that no benefits have been noticed, 95% of responding directors indicated that staff participation in AWARDS benefits the children in some way. The two most popular examples of impact were that improved morale has created more positive child-teacher interactions and that staff members are seeking more education, which leads to higher quality care for children.

Ninety-nine percent (99%) of responding directors reported positive attitudes toward AWARDS in their child care programs. One of the directors who stated that attitudes were somewhat negative said, “Overall, we LOVE Infant-Toddler Educator AWARDS® & believe that it is WONDERFUL!!!!! Our county does not offer WAGES. Our ‘educated’ Threes, Fours and Pre-K teachers feel that they should also be eligible for an added bonus/incentive.” Several
respondents indicated the need for a supplement program for teachers working with all age groups.

• Ninety-eight percent (98%) of responding participants indicated that, as a result of Infant-Toddler Educator AWARDS®, they feel more appreciated and recognized for their work. Recipients emphasize the importance of the recognition and appreciation associated with the receipt of the AWARDS supplements and the impact this has on self-esteem, professionalism and morale. Not only are these things significant in themselves, but they enhance the likelihood that participants will stay in the field and seek additional education. See Appendix D for a sample of their feedback.

“AWARDS helps to validate the vital work we do as early childhood educators. It gives additional compensation that brings with it gratitude and value.” (New Hanover, family child care provider)

PROGRAM CHALLENGES
COVID-19 has had a global impact, with long-term consequences. As stated above, the future of the early childhood field is largely unknown as employers, teachers and families struggle with complex decisions about health and finances. Infant-Toddler Educator AWARDS® was challenged to determine the best ways to assist participants during this crisis and implement appropriate procedures and policies. With DCDEE support and guidance, AWARDS held participants harmless due to COVID-19 impact from March to June. AWARDS will continue to hold participants harmless for March to June in commitment periods that end in FY21, but will otherwise be resuming standard procedures.

As confirmations resume, it is expected that many participants will either not currently be working or may be working a reduced schedule. Either of these scenarios could impact their eligibility. AWARDS will revisit plans as needed with DCDEE should the state fail to make progress with the coronavirus and close child care for families other than emergency personnel. What remains clear is that early childhood professionals need compensation support now more than ever. Despite a suffering economy, it is important to sustain and increase this support as much as possible.

While COVID-19 certainly became the focal point of FY20, this was also the first year for family child care provider eligibility on AWARDS. Despite different and ongoing recruitment strategies to encourage family child care provider participation, the AWARDS output for family child care homes was set high. This output was generated in conjunction with DCDEE who provided the information on those home-based programs with seven education points, and AWARDS anticipated that 25% of that number would potentially apply. The number of applicants grew slowly throughout the year, with a total of 133 educators working in family child care homes ultimately being paid. Recruitment calls and ineligible applications suggest that the main reason more family child care providers did not participate is the requirement to have a minimum of an Associate Degree with 24 birth to five focused semester hours.

**FUNDING**

Infant-Toddler Educator AWARD$® implements several strategies to publicize that its funding comes from DCDEE. This is highlighted in every check letter and labels are now affixed to the outside of each check envelope to identify the funder. The AWARD$ fact sheets and application-based program agreements identify DCDEE as the funder and AWARD$ representatives explain the funding for the program in outreach across the state. Finally, the program evaluations give respondents the opportunity to share messages with the funder of their supplements. See Appendix E for a sample of those messages for FY20.

“Thank you so much! I was near resigning and the AWARD$ supplement made me decide to continue teaching and further pursue a bachelor's degree in education.”

Data for paid participants reflects the full fiscal year; payments were issued using more flexible procedures in response to COVID-19.
The annual turnover percentage is based on an overall population of 1250 participants. This population includes those individuals that were active during the reporting period of October 2019 - March 2020 (1209) and those who left their centers during this time (41). Active participants meet all eligibility requirements and have worked at least six months in their child care programs. Active participants might also include individuals who have left a child care program, but have since worked six eligible months in a new site. (These “reactivated” participants are not factored into the report at all until they have completed this six month period.) The annual turnover percentage is obtained by dividing the total number of participants who left their center into the total number of participants.

People who became ineligible for other reasons (i.e. position change within center, became over-income due to raise, center closure, noncompliance with the program's income documentation guidelines, failure to obtain necessary coursework) are not included in the table. They have been removed from the overall total and the turnover numbers since they were no longer eligible for Infant-Toddler Educator AWARD$ and the supplement could not have been an incentive for them to stay.

Individuals who left their child care programs and those who became ineligible due to other reasons may or may not have been paid during the current fiscal year for completing one or more commitment periods. However, they have all been paid at some time during their participation on AWARD$ and thus earned active status prior to becoming ineligible.

Appendix A: Retention
Sample Feedback Collected from AWARDS$ Surveys FY20

“These supplements increase teachers’ salaries, which as we know are too low overall. This gives them some incentive to remain employed providing consistency and continuity of care, which can be hard to find in many child care settings. It also encourages them to further their education. Overall, these programs positively affect the individual, children, families, and center as a whole.” (Alamance, director)

“Infant-Toddler Educator AWARDS® is important to me because it helps me financially pay my bills with the extra income coming in. It has encouraged me to stay in my child care job. I am a sole provider for myself and do not make much money, the award gives me a sense of encouragement and security.” (Ashe, teacher)

“I think Infant-Toddler Educator AWARDS® helps to keep teachers in their centers.” (Beaufort, teacher)

“Infant-Toddler Educator AWARDS® gives an extra incentive to stay with your present place of employment. Keeping the same teachers or staff at a child care center helps with the stability of the children and workforce! It makes you feel more appreciated and that you are being noticed for all the things that you do for the children and their parents! Thank you for providing this for us early educators!” (Beaufort, teacher)

“Infant-Toddler Educator AWARDS® has made teachers more positive. Instead of going to pre-k or elementary school, the teachers are staying because the supplement helps them. Some teachers are going back to school. Beaufort County has a low market rate and parents can't afford day care. It is hard to pay what I think teachers are worth.” (Beaufort, director)

“The supplement allows the staff to purchase items for their classrooms and personal use. I haven’t seen turnover in the infant-toddler class.” (Bertie, director)

“Infant-Toddler Educator AWARDS® has encouraged me to stay in child care.” (Bladen, teacher)

“Infant-Toddler Educator AWARDS® helps retain quality teachers. Teachers look forward to the supplement.” (Bladen, director)

“Infant-Toddler Educator AWARDS® is very important to me, it helps to ease my financial situation. Child care centers benefit because it helps them to retain staff for longer periods of time. The children benefit because they continue to have the same teachers, which helps them to feel comfortable, to bond with them, and feel secure, happy and safe. I love knowing that I can count on extra financial support.” (Buncombe, teacher)

---

1 Respondents referred to Infant-Toddler Educator AWARDS® (AWARDS$) in a variety of ways. Throughout the quotes, the name has been corrected when necessary.
“AWARD$ encourages me to stay at the same place of employment and helps bridge the gap between child care pay and daily expenses.” (Buncombe, teacher)

“Infant-Toddler Educator AWARDS® greatly helps financially and definitely helps with staff retention. Continuous care is an important part of infant-toddler development.” (Burke, teacher)

“The AWARDS supplement provides teachers with extra income and gives incentive for teachers to continue in early child care or further their education. We are very grateful for this program. I wish there was a program available for pre-k as well.” (Burke, director)

“Infant-Toddler Educator AWARDS® has increased overall income and we aren't the highest paying field. It also encourages them to stay in the program longer and not jump age groups.” (Burke, director)

“In a field where there is not a lot of money to be made, these programs help keep genuinely good teachers from seeking other employment.” (Caldwell, director)

“We are a small center and can't always offer salaries that some of the larger centers can, so it gives me a way to compensate the staff. I feel AWARDS enhances the program to be able to keep educated and qualified teachers. It enhances the quality of care for the children.” (Catawba, director)

“The Infant-Toddler Educator AWARDS® supplement is important because it promotes less turnover and increased education.” (Chowan, director)

“As a supplement to my income, AWARDS has helped me to be financially more secure. For that reason, I am more likely to stay in my current employment.” (Cumberland, teacher)

“Infant-Toddler Educator AWARDS® has helped me be a better teacher to my students in the classroom. It also brings joy to me going into the classroom knowing that AWARDS has helped me want to stay in the classroom and teach.” (Cumberland, teacher)

“The AWARDS supplement helps to ensure that I continue to stay with my career in child care.” (Cumberland, teacher)

“Infant-Toddler Educator AWARDS® helps motivate me to stay with the same company. The award provides continuity of care, which creates a safe and consistent learning environment for the children and families.” (Cumberland, teacher)

“The AWARDS Supplement gives staff an extra incentive to remain at our center as well as to continue their education” (Cumberland, director)

“I believe AWARDS is important to encourage staff to stay in their current program and it is great encouragement to seek higher education. I believe the two of these help children have a better experience in the early child care setting.” (Davidson, teacher)

“It gives teachers one more incentive to continue in their current position.” (Davidson, teacher)
“The Infant-Toddler Educator AWARDS® program kept me from looking for a new job.” (Duplin, teacher)

“Infant-Toddler Educator AWARDS® encourages people to not job hop.” (Guilford, teacher)

“Infant-Toddler Educator AWARDS® helps keep teacher turnover rates low and makes the teachers feel appreciated.” (Guilford, teacher)

“I feel the Infant-Toddler Educator AWARDS® does boost morale for those teachers who are working with the younger age groups. Having staff longevity is important. It also encourages educated staff to stay, which in turn means better care for our children.” (Guilford, director)

I thank Infant-Toddler Educator AWARD$® for recognizing that we as teachers of young children play an important part in the children’s social/emotional education as well as gross motor and physical health. The extra income provided is an incentive to stick with the job that we are at, which makes a big impact on the children. Having the same teacher and less turnover between child care providers is beneficial in the child’s development. They gain trust and security seeing the same face every morning, giving them the chance to relax and learn without the stress of greeting a new teacher every few months. Thank you again AWARD$ for caring about not only the teachers, but our children. They are our future. We need to get them started off on the right foot today. They are our future leaders. They are our most precious resources!” (Onslow, teacher)

This reward was a thank you to me for doing a great job and really made my day when I received it. It really made me feel so much better about what I do. I love working with children. Seeing their faces light up when they learn something new brings joy and reassurance that I am doing something right. That is the biggest reward of all, but receiving a monetary reward is awesome. It gives you the flexibility to get new things for your classroom, that in turn, lights up their faces. Thank you so much for my reward.” (Pender, teacher)
