As more and more women with young children enter the workforce and with the growth of nontraditional families, the need for child care has increased. Research time and again points to the pronounced effects that a high quality child care experience can have on a child’s school readiness and life-long success. As an equity strategy, high quality early care and education provides even greater benefits for young children living in poverty. Further, investments in high quality early care and education have a multi-generational effect, not only providing a safe and nurturing place for children, but also supporting families as they work or further their own education. With the ravaging worldwide effects of the COVID-19 pandemic also destroying the child care infrastructure that North Carolina has spent decades building, a specific, concerted effort at rebuilding this indispensable resource for working parents must emerge as priority one in our state.

Given these factors, the status of child care for our youngest children must be examined to help inform our future direction. As part of the statewide Infant-Toddler Child Care Landscape Study funded by the NC Early Education Coalition, Think Babies™ NC Alliance, data were collected and analyzed on infants and toddlers and their families as well as on early care and education centers and homes in each county. This report summarizes key findings from a variety of sources designed to paint a picture of the infant-toddler early care and education landscape within the county.

Data in this report focus solely on licensed child care programs (centers and homes) serving children birth through five years old and the children in these programs. Except where noted, data do not reflect total population numbers, but only those birth to five year old children using licensed early care and education programs in North Carolina. For purposes of this report, infants and toddlers are defined as young children birth up to age three (36 months). Throughout the report, data from various points in time are discussed to show both trend data and the effects of the COVID-19 pandemic.

Detailed information about source data, methodology and data limitations can be found in the statewide Infant-Toddler Child Care Landscape Study at childcareservices.org. Totals may not equal one hundred percent due to rounding.
## 2021-2022 Ashe County
Infant-Toddler Child Care Landscape Study

| Status of Young Children | • 632 Number of infants, one and two year olds in the county.¹  
| | • 469 Number of infants, one and two year olds with all parents working.¹²  
| | • 136 Current number of infant-toddler spaces in licensed early care and education programs.³  
| | • 4% Vacancy Rate.³  
| Cost of Child Care | • $700 Median monthly full-time cost for an infant.⁴  
| | • $700 Median monthly full-time cost for a one year old.⁴  
| | • $662 Median monthly full-time cost for a two year old.⁴  
| | • 50% Programs that offer a sliding fee scale for parents.³  
| | • 50% Programs that offer a multi-child discount for parents.³  
| Program Schedules | • 100% Programs open at or before 7:00 am.³  
| | • 25% Programs close at or after 6:00 pm.³  
| | • 10.50 Median number of hours programs are open each weekday.³  
| | • 0% Programs open on Saturdays.³  
| | • 0% Programs open on Sundays.³  
| Workforce Salary/Education | • $10.25/hr Median starting wage for assistants in infant-toddler rooms.⁴  
| | • $11.75/hr Median starting wage for teachers in infant-toddler rooms.⁴  
| | • 100% Programs that require assistants in infant-toddler rooms to have at least some formal education past high school.⁴  
| | • 0% Programs that require teachers in infant-toddler rooms to have at least an associate degree.⁴  
| Program Services | • 0% Programs that have bilingual staff available who work with infants-toddlers.⁴  
| | • 0% Programs that offer transportation services to infants-toddlers.⁴  
| | • 100% Programs that offer part time care for infants-toddlers.³

Thank You for Your Support

Data for this publication was gathered and analyzed by Child Care Services Association. The principal investigator was Mary Martin with contributions made by Allory Bors and Rachel Osborne. The study was based on the 2016 study also by Child Care Services Association, *Who’s Caring for Our Babies Now?* and was greatly expanded.

CCSA appreciates the Child Care Resource and Referral agencies across the state as well as the North Carolina Division of Child Development and Early Education for supplying much of the data for this study. A special thanks to child care center directors and family child care providers who responded to survey requests and for those who attended focus groups. For all you do to care for and educate the youngest of our children, we are eternally grateful.

Funds for this study were provided by the NC Early Education Coalition, Think Babies™ NC Alliance.
